Submission of indexes for conference proceedings

We encourage conference organizers to use arXiv as a way to distribute and archive conference papers. Conference proceedings may be made as a single submission (which is handled in the normal way), or as a set of individual papers with an index submission. **Note** individual papers within a proceedings must still conform to arXiv content policies and are moderated, as usual. Ideally, an index or overlay should provide information beyond what would be available from a keyword search on the [Report-no](#) metadata field.

In general, we prefer arrangements where the respective authors submit the individual papers. We provide two ways of partially automating the process of creating HTML index submissions which are best suited to two different scenarios:

- [Index submitted after the individual papers](#). We have support for the automatic extraction of metadata from the individual submissions using special processing instructions from within an HTML index submission which lists the arXiv identifiers of the individual papers. A good example is [arXiv:1205.2597](#).
- [Index submitted before the individual papers](#). We have support for automatic linking to a search on the report number field. Conference organizers must instruct the submitters of individual papers to include a unique report number in the [Report-no](#) field of their submission. The HTML index submission includes

special processing instructions which create links to the report number search.
An example using this approach is [arXiv:1108.3558](#).

Please note that conference announcements, or indexes without the articles indicated, are not permitted. We accept index submissions before the submission of individual papers with the understanding that the majority of papers at the conference will be submitted. If in doubt [contact arXiv administrators](#). Note that it is not appropriate to submit an overlay or index of content not in arXiv.

Index submission after individual papers

The simplest way to make a proceedings or index entry is to create an HTML submission using special `LIST:arXiv:YYMM.NNNN` or `LIST:arch-ive/YYMMNNN` (only for [old identifiers](#) like hep-lat/9801024), directives which are expanded by arXiv's HTML interpreter to the full title/author listings in the usual local format (with the author names linked to the search; using whatever cookies the users' browsers send to determine the output format; and all paper links local to the same site the index is retrieved from).

Keep the HTML simple and be sure to include the `LIST:arXiv:YYMM.NNNN` directives on separate lines without any leading whitespace. A good example is [arXiv:1205.2597v1](#), for which the source HTML is:

```
<html>
<head>
<meta charset="UTF-8">
<title>UAI 2010</title>
</head>
<body>
<h1>UAI 2010 Proceedings</h1>
```

```
Editors: Peter Grunwald, Peter Spirtes<br /><br />
Catalina Island, CA, July 8 - July 11 , 2010<br />
AUAI Press, Corvallis, Oregon, 2010, ISBN: 978-0-9749039-6-5<br /><br />
```

```

<!-- Incorporating Side Information in Probabilistic Matrix
Factorization with Gaussian Processes -->
LIST:arXiv:1003.4944
<!-- Gaussian Process Topic Models -->
LIST:arXiv:1203.3462
<!-- Timeline: A Dynamic Hierarchical Dirichlet Process Model for
Recovering Birth/Death and Evolution of Topics in Text Stream -->
LIST:arXiv:1203.3463
<!-- Gibbs Sampling in Open-Universe Stochastic Languages -->
LIST:arXiv:1203.3464
<!-- Compiling Possibilistic Networks: Alternative Approaches to
Possibilistic Inference -->
LIST:arXiv:1203.3465

...

</body>
</html>

```

Unfortunately, if the index submission is made after the papers are submitted then there is no easy way for the individual papers to link to the index submission. Instead, submitters of the individual papers should add an appropriate comment, e.g.

Comments: Plenary talk presented at Lattice97

If organizers wish to have the papers of a proceedings link to the index submission there is obviously a submission order problem. (Which came first, the chicken or the egg?) As noted above, we will accept submission of an 'empty' index submission given appropriate assurances that the majority of the papers will be submitted. Any 'placeholder' index submission should be made just in advance of the actual submissions and should be updated (using [replace](#)) promptly to add links to the individual submissions.

The individual papers

There need be no special considerations for the individual papers. If the index submission identifier is known at the time of submission then a link to the index submission may be included in the comments, e.g.

Comments: 14 pages. Part of LATTICE 97 proceedings (arXiv:hep-lat/9801024)

the identifier in the comments will be automatically linked to the abstract page, no explicit HTML link is necessary (or desired) in the metadata submitted.

Index submitted before individual papers

The HTML index submission should consist of the title, author, etc., and a report number for each paper. The report numbers must be included with special `REPORT-N0:AIWorld/2003/01` directives which are expanded by arXiv's HTML interpreter to link to the individual papers.

Keep the HTML simple and be sure to include the `REPORT-N0:AIWorld/2003/01` directives on separate lines without any leading whitespace. For example:

```
<html>
<head>
<meta charset="UTF-8">
<title>AI World Conference 2003</title>
</head>
<body>
<h1>AI World Conference 2003</h1>

<dl>
<dt><b>New developments in AI</b></dt>
<dd>Fred Bloggs, Bill Smith<br />
  (paper
  REPORT-N0:AIWorld/2003/01
  )
</dd>
```

```
</dl>

...

</body>
</html>
```

which would be rendered as

New developments in AI : Fred Bloggs, Bill Smith

(paper [AIWorld/2003/01](#))

The report numbers themselves should be chosen so that they will be unique. This means that they should usually include the conference name or abbreviation, the year and the paper number.

Individual submissions

The individual submissions must include the appropriate report number in the **Report-no** field. They should also include a link to the index submission by including the identifier of the index submission in the **Comments** field, e.g.

```
Comments: Presented at AI World Conference, 2003
(arXiv:cs/0101200)
Report-no: AIWorld/2003/01
```

The paper id in the comments will be linked in the abstract display page. Additional report numbers may be included in the **Report-no** field and should be separated with semicolon and a space, e.g.

```
Report-no: AIWorld/2003/01; CornellCS-03-23
```

The individual submissions must be submitted to the same archive as the index submission (the subject class may differ). This is because the report number search from the index submission will be limited to that archive.
